Bedford Public Schools Bedford, Massachusetts

To the Class of 1961,

Competitive forces are ever on the increase; superior abilities plus the ambition, initiative, and determination to use these abilities, are required of those who will reach the heights of success in their chosen vocations; woven through out all this is the meaning of the word "sacrifice."

In life, strong competition is the challenge which brings out our best qualities. Make the most of your educational opportunities, meet the challenge squarely, and one will have an excellent chance of emerging victorious.

To the Class of 1961,

Your school life has been filled with experiences that developed an awareness of others in relation to yourselves. You have worked together, played together and planned together as these pages show. May the memories gathered from within the walls of your school strengthen respect for the other fellow and his rights, and may they increase your appreciation for each one's contribution to the human epic of friendship and good will.

Sincerely yours,

MESSAGE TO THE CLASS OF 1961

You are about to enter an academic and vocational world that, of necessity, is becoming increasingly impersonal and highly organized on a group basis. It will be relatively simple, under the circumstances you will face, to surrender your individuality and to accept occurrences as inevitable beyond your ability to effect a change. For the sake of your peace of mind and the future of our society, it is my hope that you will realize this threat and meet it effectively. How may you do this? By understanding that you are not the passive victim of your environment, but an active explorer and creator of stimuli which bombard you. In perceiving, in learning, in forgetting, in imagining, and in rationalizing, you are selecting from all of the potential aspects of your world those which best satisfy your needs for personal growth and development. If you forget the achievement of your own personality and your own future, you are bound to deal with this future and reality inappropriately and to become generally frustrated. I wish you the best of good fortune in your attempt to solve this problem that you will find so intrinsically your own.
